

# Halloween Guidelines

## Center for Disease Control

- Do NOT use costume masks in replacement of cloth masks. *Unless*, costume mask is made from two or more layers breathable masks.
- Do NOT double layer a costume mask with a cloth mask as it would make it harder to breathe.

### Lower Risk Activities

- Carving or decorating pumpkins with members of your household or social circle at a safe distance.
- Outdoor Halloween scavenger hunt. 🧛
- Halloween movie night.

### Moderate Risk Activities

- One-way trick-or-treating where single wrapped candy bags are available for grab n' go.
- Visiting pumpkin patches or orchards where people use hand sanitize before touching pumpkins or picking up apples.

### High Risk Activities

- Participating in customary trick-or-treating where treats are handed to children who go door to door.
- Attending crowded Halloween parties indoors or outdoors with no social distancing in place.
- Attending a fall festival that is not in your community if you live in area with community spread of COVID-19.

*These guidelines are set by the Centers for Disease Control & Prevention, additional activities for Halloween and upcoming holidays can be found on the official website of the [CDC](#).*

*Susceptible populations such as the elderly, immunocompromised, and pregnant women are encouraged to stay away from large gatherings.*
